## Cellulose Hydro Gel Mask

### Description

Hydro Gel Mask is cultivated by the activation of lactic bacteria which becomes 100% cellulose. It was originally used as a bandage to heal serious burn wounds by providing continuous soothing, cooling, and moisturizing. This mask contains powerful antioxidants and silk peptides to rejuvenate the skin and reduce the appearance of wrinkles. Arbutin, an excellent whitening ingredient, helps make skin dazzling and transparent.

**Skin Type:** Recommended for all skin types with any skin condition, especially dull and aged skin.

### Benefits:

- ❑ Helps rejuvenate the skin and reduce the appearance of wrinkles.
- ❑ Helps clarify the skin.
- ❑ Helps fight wrinkles and blemishes, lighten hyperpigmentation, and hydrate the skin.
- ❑ Key ingredients penetrate deeply to supply moisture and nutrients.

### Ingredients

Arbutin, NAG (n-acetyl-D-glucosamine), Switzerland Alphin Extract, Hyaluronic Acid, Silk Peptide, Bio Cellulose.

Arbutin	Extracted from the bearberry plant, it is a skin lightening agent that inhibits tyrosinase and prevents the formation of melanin.
Bio Cellulose	Bio cellulose is an organic skin care material that's cultured in a lab and infused with beneficial skin care ingredients. The unique qualities of bio cellulose masks make them the perfect treatment for delivering skin care ingredients in mask form. Bio cellulose is extremely hydrophilic, or "water loving". In fact, bio cellulose fabrics have a fluid-holding capacity of up to 100 times their dry weight. Bio cellulose also has a very high degree of crystallinity, which is another way of saying that the microfibers in bio cellulose fabrics are tightly intertwined and quite strong – 4 times stronger than ordinary cellulose.
Hyaluronic Acid	A substance that occurs naturally in the dermis. It is a natural moisturizer with excellent water-binding capabilities. When applied to the skin, it forms a film similar to the way it holds water in the intracellular matrix. The ability to hold water provides smoothness, improving the skin's appearance.
NAG (n-acetyl-D-glucosamine)	NAG is a derivative of glucose. It is good for UV damaged skin and hyperpigmentation.

---

Silk Peptide	From the center of the silk worm yarn. Can be absorbed directly by the human skin and helps revitalize the skin. It is a natural moisturizer and help increase the skin's elasticity. It also helps control the melanin in the skin.
Switzerland Alphin Extract	Soothes the skin.

**Usage Instructions**

1. Apply the mask on a thoroughly cleansed face.
2. Leave on for 15 to 20 minutes.
3. Lightly massage the remainder of the mask until it is completely absorbed.
4. Do not rinse or wash the face after use.
5. Remove any residue and finish with a toner and moisturizer.
