
24 Karat Gold Collagen Hand Mask

Description

The 24 K Gold Collagen Hand mask quickly permeates deep into the skin, helping to smooth fine lines on the hands, repair damaged cells, eliminate aging skin, and restore soft, delicate hands. It supplies necessary moisture and nutrients, helping to make the skin soft, supple, smooth, and flawless. Creates a protective barrier against moisture loss and provides maximum hydration, nourishment, and protection to dry, rough, overworked skin.

Skin Type: All skin types.

Benefits:

- ❑ Nourishes, moisturizes, hydrates.
- ❑ Creates a protective barrier against moisture loss.
- ❑ Helps smooth and repair damaged skin

Ingredients

Aqua, Marine Collagen, Glycerin, Allantoin, Hyaluronic Acid, Hydrolyzed Glycosaminoglycans, Colloidal Minerals, Sodium PCA, 24 K Nano Gold Particle, Aloe Extract, Natural Moisturizing Factor, Methylparaben, Dimethicone, Decyl Oleate

24 K Nano Gold Particle	Gold particles have a very good catalytic function and can effectively get rid of free radicals that cause aging in the human body.
Allantoin	A botanical extract that is healing and soothing. An excellent anti-irritant (temporary) that helps heal damaged skin by stimulating new tissue growth.
Aloe Extract	An emollient with hydrating, softening, healing, antimicrobial, and anti-inflammatory properties.
Aqua	Water
Colloidal Minerals	Colloidal minerals are groups of mineral molecules held together by special electrical properties dispersed or suspended in a liquid. When in colloidal form the minerals remain evenly dispersed in the water. Colloidal minerals are able to maintain their own identity while being suspended in water. Having a variety of forms of iron in the colloidal suspension will increase the absorption rate.
Decyl Oleate	An emollient with good penetrating properties. It facilitates product spreadability and provides the formulation with a good feel on the skin.
Dimethicone	A form of silicone that give products lubricity, slip, and a good feel.

Glycerin	A solvent, humectant, and emollient. It absorbs moisture from the air.
Hyaluronic Acid	A substance that occurs naturally in the dermis. It is a natural moisturizer with excellent water-binding capabilities. When applied to the skin, it forms a film similar to the way it holds water in the intracellular matrix. The ability to hold water provides smoothness, improving the skin's appearance.
Hydrolyzed Glycosaminoglycans	Has hygroscopic (capable of absorbing moisture) properties. Its small molecular structure allows it to penetrate the outer epidermal layers.
Marine Collagen	Derived from the substance found on fish scales. Helps diminish the signs of aging and decrease the negative effects of toxins.
Methylparaben	Preservative used to combat bacteria and molds.
Natural Moisturizing Factor (NMF)	Found in the corneum layer, NMF is made up of hygroscopic (capable of absorbing moisture), water soluble substances that regulate the layer's selective permeability. When included in skin-care products, they appear to help stabilize and maintain this complex intercellular-skin matrix. NMFs help keep the intercellular area of the skin intact. This helps prevent surface irritation from penetrating deeper into the skin, helps keep bacteria out, and aids the skin's immune/healing system. Using moisturizers that contain NMFs allows your skin to repair itself without the problems brought on when skin is suffering from dryness, environmental distress, or excess irritation.
Sodium PCA	High performing humectant derived from amino acids. Found naturally in the skin.

Usage Instructions

1. Open foil pack, remove the two sections of the 24 Gold Crystal Hand Mask, and place on cleansed dry hands.
2. Remove after 18 to 20 minutes. Do not rinse or cleanse hands after treatment.
3. Allow the remaining ingredients to be absorbed by the skin or massage lightly for better permeation.
