
Rosa Graf Concentrated Treatment Ampoules

Each Multipulle bottle contains 30 ml of a concentrated complex of active ingredients. Each ampoule is sufficient for 15-20 treatment. They can be mixed with each other for special treatment purposes. Each bottle comes with a 2 ml syringe to measure out the correct amount needed for a treatment. If unopened, the Multipulle concentrates can be kept for 3 years. Once opened, they should be used within 3 months.

Q10	<ul style="list-style-type: none"> <input type="checkbox"/> Emulsion based, Q10 is a unique radical trap. <input type="checkbox"/> Extracted from plant cultures that are identical to that of the skin. <input type="checkbox"/> Helps prevent aging due to environmental factors. <input type="checkbox"/> Helps balance out minor skin damage and stabilize the skin's immune system.
Repair	<ul style="list-style-type: none"> <input type="checkbox"/> Promotes regeneration <input type="checkbox"/> Increases skin's ability to store moisture for a smoother complexion

Usage

Multipulle Concentrates can be introduced into the skin in a variety of ways:

- Massaged into the skin - apply contents of syringe directly on the skin and massage in for about 5 minutes.
- Massaged into the skin under steam - empty the contents of the syringe onto your hands and apply it on the skin. Use the steamer for 5 minutes.
- Introduced using ultrasound - mix the contents of the syringe with a gel suitable for use with ultrasound in a small container, and then apply the mixture to the skin using a cosmetic brush. Proceed with the ultrasound treatment.
- Introduced using iontophoresis with a positive polarity - empty the contents of the syringe into your hands, and then apply it on the skin. Proceed with the galvanic treatment with the unit set to positive polarity.

If desired, one-half of the 2 ml portion can be applied under a masque and the remainder can be massaged into the skin before applying your regular massage cream.
